

EDUCATION

Harvard University

A.B. in Computer Science and Economics

Cambridge, MA

Aug 2023 – May 2027

- **Coursework:** Discrete Mathematics, Intro to Algorithms, Linear Algebra, Data Structures & Algorithms, Computation for Contemporary Sciences, Visualization, Introduction to Probability, GenAI
- **Clubs:** Harvard WECODE, Harvard Women in CS, HUMIC, Harvard Society of Black Scientists and Engineers

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, C/C++, SQL, HTML/CSS, JSON

Frameworks & Libraries: PySpark, FastAPI, React.js, Next.js, LangChain, Tailwind CSS, Node.js, Flask, TensorFlow, PyTorch

Databases & Tools: PostgreSQL, MySQL, Pinecone, Flyte, OpenHouse, Git, Docker, REST APIs

PROGRAMS & CERTIFICATES

Amazon Web Services (AWS) Skill Builder — 1) AWS GenAI Essentials, 2) AWS Technical Essentials

Oct 2025

Salesforce Trailhead Academy — Get Started with Agentforce for Service (AFS002)

Oct 2025

Intuit — Intuit Tech Stories (Virtual)

Oct 2025

InternXL x AFROTECH — InternXL AI Innovation Challenge

Oct 2025

CodePath — Intermediate Technical Interview Prep

Aug 2025

RELEVANT WORK EXPERIENCE

LinkedIn

Sunnyvale, CA

Software Engineering Intern

May 2026 – Aug 2026

- Built the Context Agent for an AI labor-market intelligence platform, converting anomalies surfaced from ~42M member profiles and 7.6M job postings into structured investigations and grounded evidence for generated labor-market articles.
- Engineered source scoring, deduplication, support/challenge balancing, provenance tracking, and bundle-sufficiency checks, increasing hypothesis/query plans meeting the highest quality tier from 5.7% to 86.4% and usable evidence bundles from 2.1% to 90%.
- Built an end-to-end Economic Graph pipeline that identified top-growth industries, ranked their fastest-growing companies across size bands, validated each signal with postings, views, applications, and role mix, and generated evidence-backed articles; surfaced 111 Tier-1 opportunities from 407 candidates across 9 industries.
- Extended LinkedIn's HERO Generative Recommender evaluation stack across PySpark, Flyte, and OpenHouse, adding an underserved-job benchmark, slice-aware semantic metrics, and leakage controls for 1.08M held-out member-job pairs; evaluated 3,982 jobs and found a 17.3 percentage-point Good-Fit P@200 gap between underserved jobs and the existing benchmark.

Harvard College GenAI Research Program

Cambridge, MA

Software Engineering Intern

June 2025 – Aug 2025

- Engineered a bilingual RAG tutor translating English textbook material into Swahili, improving comprehension by ~20% for students in rural Kenya.
- Increased retrieval accuracy from 70%→95% by processing 1K+ textbook chunks with LangChain, Pinecone, and GPT-4 Turbo.
- Optimized PostgreSQL schemas and RESTful FastAPI endpoints, reducing query latency from 5s to < 2s.
- Developed three tutor modes (summarization, revision Q&A, free-form) using a Next.js/Tailwind + FastAPI stack with <2s response times.
- Piloted with 56 students; dual-language (English + Swahili) output boosted accessibility and syllabus alignment.

Kerugoya County Referral Hospital

Kerugoya, Kenya

Software Engineering Intern / Priscilla Chan Fellow

June 2024 – Aug 2024

- Built hospital management portal automating records, billing, and scheduling for 1,000+ patients, cutting wait times by 30%.
- Developed ERP/EMR modules in Java/Python with Frappe, deployed via Docker, and integrated MySQL + REST APIs.
- Worked across Agile sprints on feature design, reviews, debugging, and testing; reduced post-deployment defects by 25%.

TECHNICAL PROJECTS (VIEW FULL GALLERY)

Flashcards App

Mar 2025 – May 2025

- Engineered a multilingual flashcards system generating English–Swahili study summaries with GPT-4 and integrated text-to-speech for auditory learning.
- Implemented dynamic caching and session state management to reduce API response time from 4s→1.8s and ensure consistent bilingual output.

WECODE Conference Platform

Sep 2025 – Mar 2026

- Co-developing a full-stack platform supporting authentication, registration, and mentorship matching using React, Supabase, and Node.js.
- Designed reusable React components and modular backend workflows to improve maintainability and deployment reliability across collaborative branches.

LEADERSHIP & ACTIVITIES

Harvard Undergraduate Machine Intelligence Community (HUMIC)

Cambridge, MA

Project Lead & Web Scraping Engineer

Sept 2024 – Present

- Promoted from Fellow to Project Lead; developed Harvard's first self-learning assistant using CrewAI multi-agent frameworks.
- Built web scraping pipelines with Python (BeautifulSoup, Requests) and BraveSearch API to collect educational content.
- Coordinate profiling, ranking, and roadmap teams integrating user data for personalized learning.

Harvard WECODE

Cambridge, MA

Associate Director of Engineering

Sept 2025 – Present

- Co-develop WECODE's inaugural engineering portal for the world's largest student-run women-in-tech conference (1,200+ attendees).
